

Job Overview:

We are seeking motivated and passionate entry-level software engineers specializing in **one of the following areas:**

1. **MERN Stack Web Development**
2. **Mobile App Development using React Native**
3. **CMS-based Development using Drupal**

We are looking **only for candidates who have explored above and beyond their curriculum to have achieved working experience through passion projects, open source contributions or college projects, in one of the above streams.**

As an Entry-Level Software Engineer, you will work with our dynamic development team to build, maintain, and enhance user-centric applications that align with the latest industry standards. Whether you are passionate about creating web applications, mobile apps, or CMS-driven solutions, we encourage you to apply and grow with us.

Key Responsibilities:

- Collaborate with cross-functional teams to understand project requirements and contribute to planning and execution.
- Develop, test, and maintain software solutions that meet business and technical specifications.
- Engage in the full software development lifecycle, including coding, testing, debugging, and documenting.
- Work on both front-end and back-end tasks based on project needs and specialization.
- Participate in code reviews and provide constructive feedback to team members.
- Continuously learn and adapt to new technologies and frameworks.
- Contribute to the troubleshooting and resolution of issues, ensuring a seamless user experience.

Qualifications:

- Bachelor's degree in Computer Science, Information Technology, Engineering, or a related field.
- Demonstrated experience or project work in one of the following:
 - **MERN Stack Web Development:** Proficiency in MongoDB, Express.js, React, and Node.js.
 - **Mobile App Development using React Native:** Hands-on experience building cross-platform mobile applications with React Native.
 - **CMS-based Development using Drupal:** Familiarity with Drupal site building, theming, and module development.
- Basic understanding of front-end technologies (HTML, CSS, JavaScript) and familiarity with REST APIs.
- Strong problem-solving abilities and attention to detail.
- Good communication and teamwork skills.
- Eagerness to learn and work on diverse technology stacks based on project needs.

Preferred Skills:

- Knowledge of version control systems like Git.
- Familiarity with Agile methodologies.
- Basic understanding of CI/CD tools and DevOps practices is a plus.

What We Offer:

- Mentorship from experienced developers and opportunities for continuous learning.
- Exposure to real-world projects and cutting-edge technology.
- A collaborative and supportive work environment.
- Competitive compensation and benefits package.
